For each question, note down your confidence level between 0-10, with 0 indicating the lowest level of confidence and 10 indicating the highest level of confidence.

Consider the following three tables: PC, Laptop and Product, and the data as given.

Sample Data for Product

Compute the results for the plans below, for each of the steps labeled with a number. When reporting the result, you must include the names of the columns of each result table, along with the data.

Note: You can report your confidence level for each of the steps for each question (or) you can report one confidence level for all the steps for a question.

Plan 1: Compute the results for steps labeled (1) ... (7) [5 pts]
